Experienced, forward-looking Software Engineer with 7.5 year of background in creating and executing innovative software solutions to enhance business productivity. Highly experienced in all aspects of the software development lifecycle and end-to-end project management, from ideation to development and delivery. Skilled at coordinating cross-functional teams in a fast-paced, deadline-driven environment to steer timely project completion.

WORK EXPERIENCE [8 Year]

Software Development Engineer 3, Flipkart [Oct 2022 - Present]

- Lead the development of the new accounting persistence layer.
- Lead the development of the new platform for commission invoicing.
- I lead the accounting and post-order platform migration as part of the org-initiative.

Software Development Engineer 2, Flipkart [April 2020 – Oct 2022]

- I re-design the invoicing system to reduce the processing time for b2b invoices by 20-30x.
- I designed and developed a robust reporting system for the Flipkart Wholesale Accounting team that included over 50 reports.
- I developed a robust reporting framework using Big Data technologies such as Apache Druid and ClickHouse to provide valuable insights to the business team regarding Ads performance. The framework was designed to handle large volumes of data in real-time, ensuring that the business team had access to the most up-to-date information.

Software Development Engineer 1, Flipkart [July 2018 – April 2020]

- I developed several data pipelines using the MapReduce programming model for Ads.
- I migrated the Ads attribution system from a Hive-based implementation to Apache Crunch. This involved re-designing and re-implementing the system using Apache Crunch, a more efficient and scalable framework for large-scale data processing.

Intern, Amdocs [May 2017 – Jul 2017]

- I was tasked with creating an automation system for deployment.
- I designed and developed a custom automation system using shell scripting.
- The automation system included the capability to generate multiple servers and their corresponding databases. Additionally, the system performed a post-deployment system check to ensure smooth operation after the updates were applied.

EDUCATION

Year	Degree	Institute	Percentage / GPA
2014-2018	B. Tech: Electronics and Communication Engineering Minor: Computer Science and Engineering	IIT(ISM) Dhanbad	OGPA = 8.35 (out of 10)
2014	Bihar School Examination Board Intermediate (XIIth)	College of Commerce Patna	71.2%

2012	Bihar School Examination Board Matriculation (Xth)	High School Daniwan Patna	87%
------	--	------------------------------	-----

SKILLS

- Programming languages: Java, Python, Scala, SQL, Scripting
- Tools and technologies: Software Development, Big Data Ecosystem, Distributed System, REST API, Agile Methodologies, System Design, Data Analysis
- Strong problem-solving and analytical skills
- Excellent communication and collaboration skills
- Ability to work effectively in a fast-paced, dynamic environment
